

Special Improvement District No. 5 2026 Augmentation Pipelines

Addendum No. 1

This addendum is issued in reference to various parts of the Plans and Contract Documents and to document responses of questions from potential Bidders. The following information shall be incorporated in the referenced Contract Documents and Specifications:

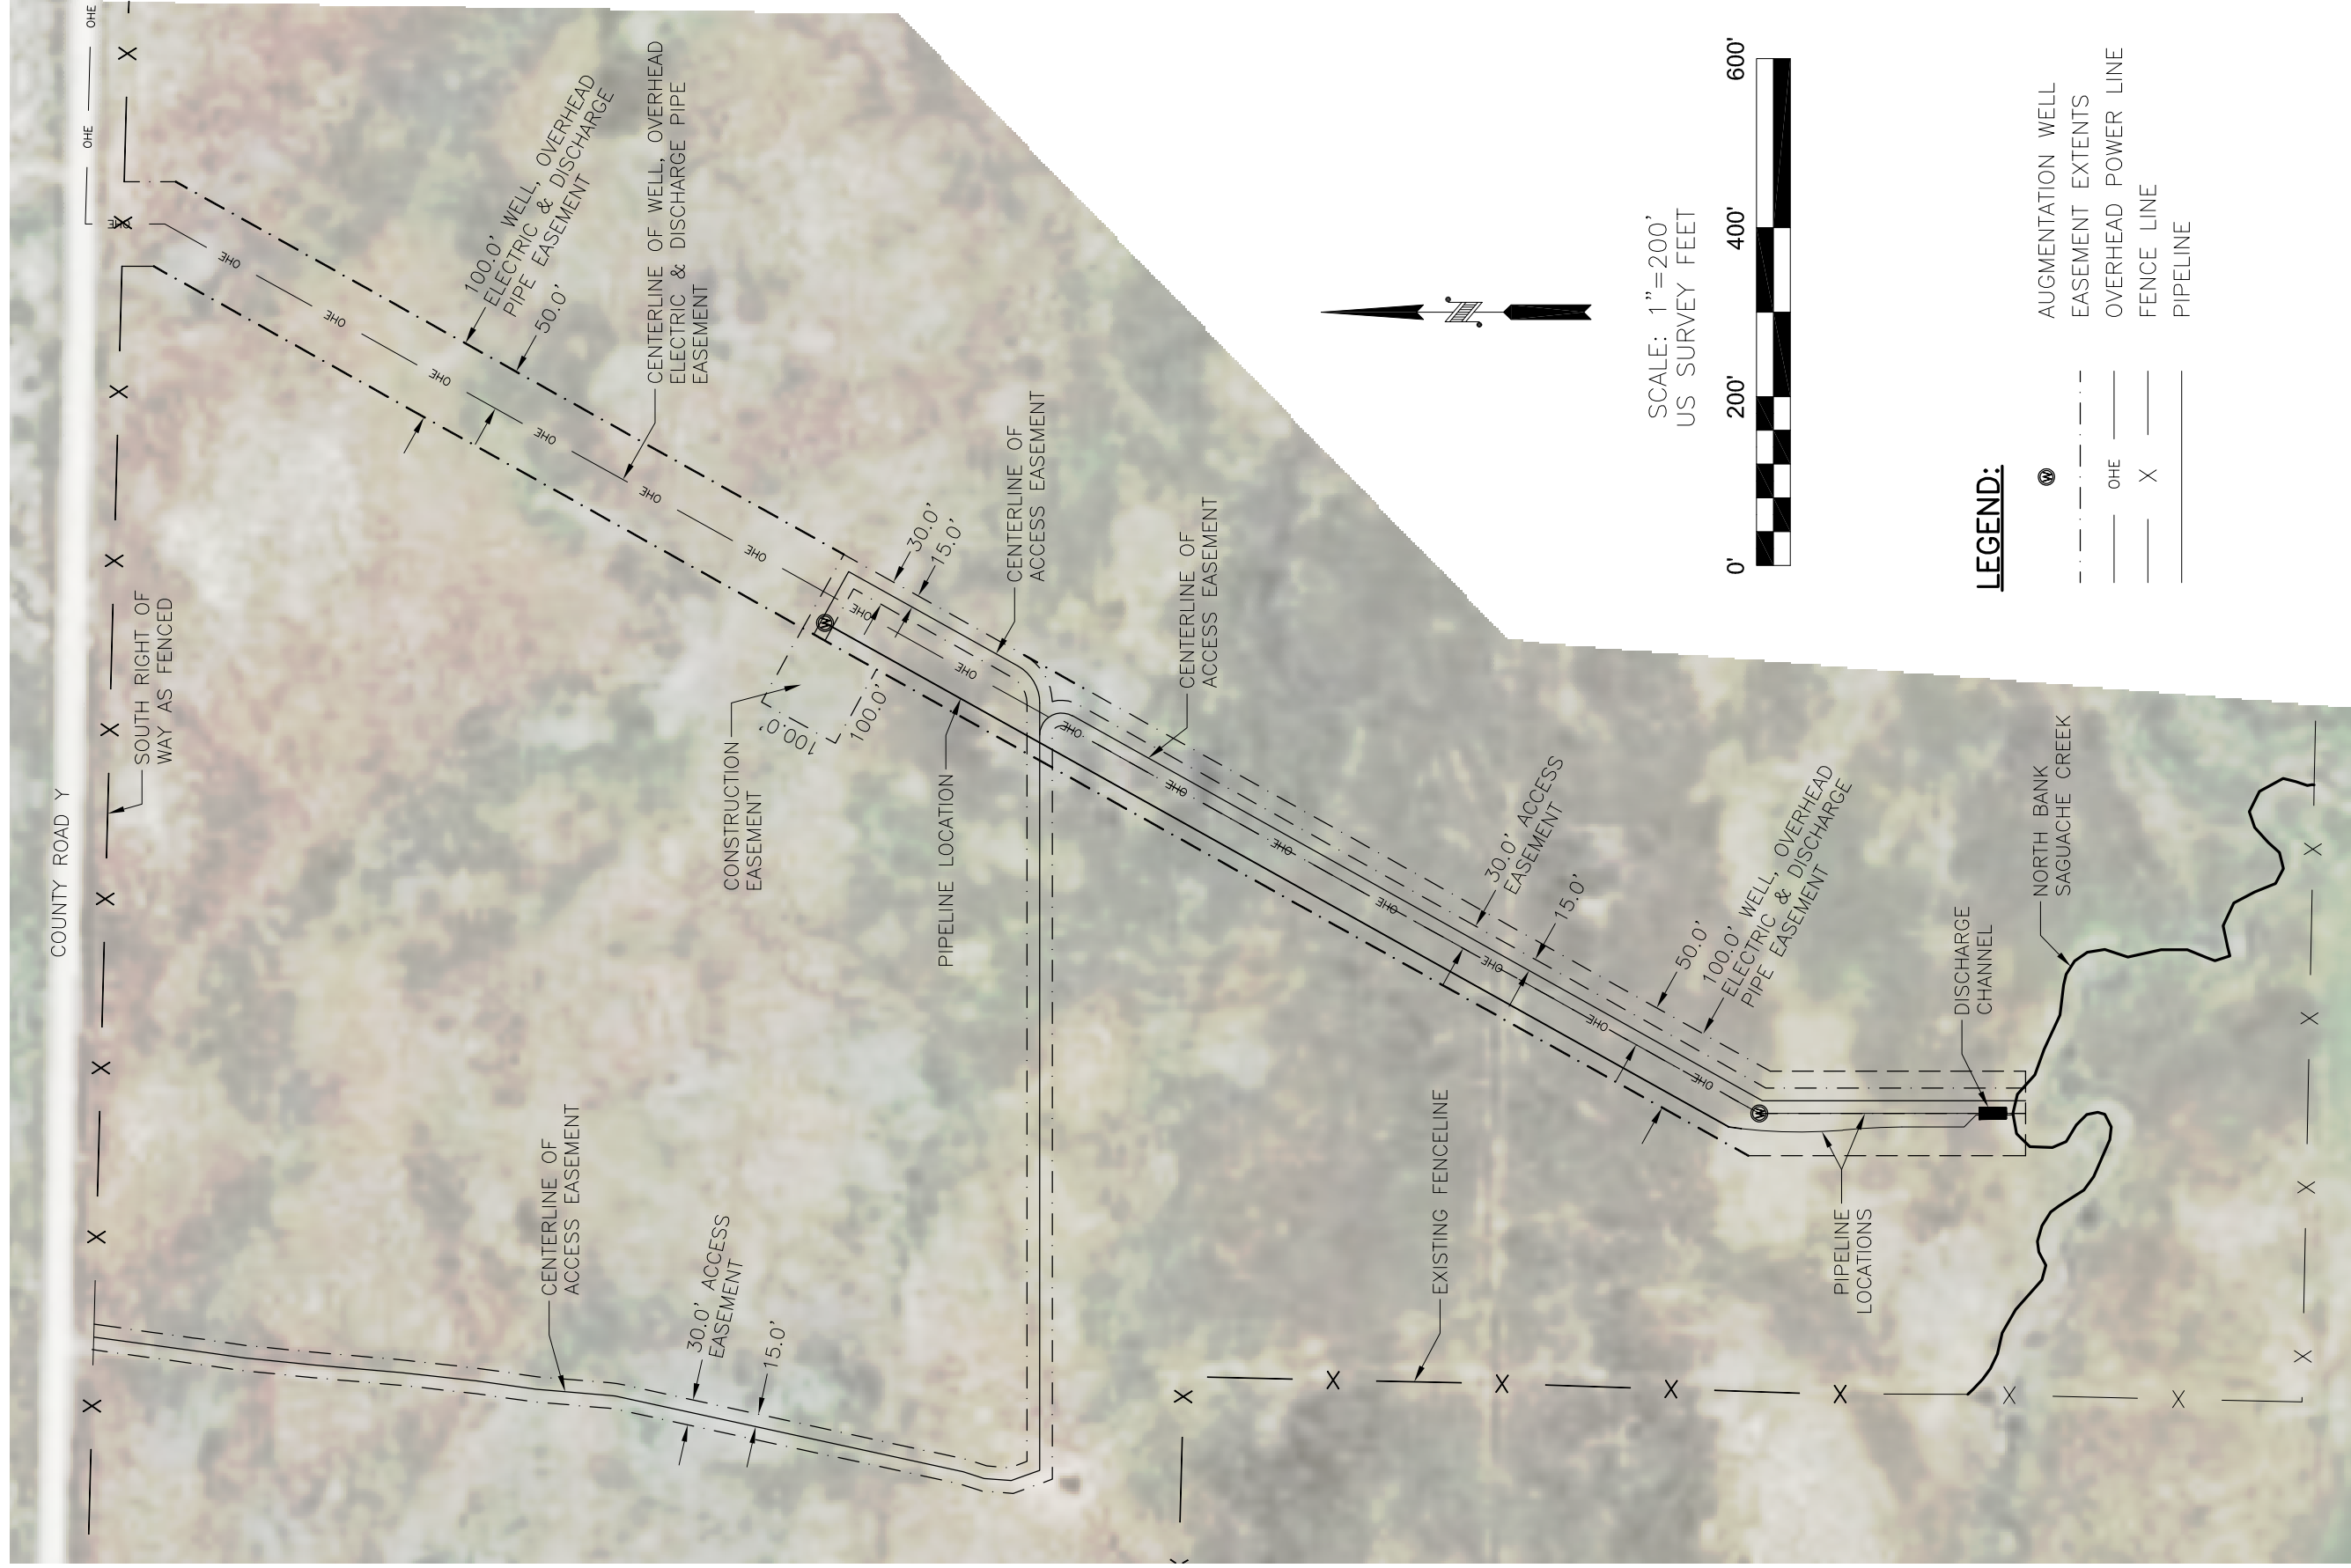

1. DES will perform construction staking as requested once the contract is awarded.
2. Riprap shall be 12" minus with no less than 60% plus 6" and angular in shape, as per Item 4 of the specifications.
3. The flowmeter requirement has been revised such that flow straightening vanes are no longer required for any pipelines. As a result, the minimum upstream/downstream diameters of smooth pipe are critical.
4. Maps of the permanent easements and construction easements at Well Sites A & B have been enclosed. Note that the subdistrict owns the property the additive alternate Well C and Pipeline C may be constructed on.
5. The insurance requirements have been revised based on CWCB feedback. A document from CWCB detailing the minimum insurance requirements for this project has been enclosed.
