Protecting & Conserving San Luis Valley Water

Date: 11-09-2017

RE: Subdistrict No. 1 Replacement Water Accounting for the month of October, 2017.

Dear Mr. Cotten,

The following is the Subdistrict No. 1 Replacement Water Accounting for the month of October, 2017. As per the Terms and Condition No. 7 of the 2017 Annual Replacement Plan (ARP) Approval for Special Improvement Subdistrict No. 1 of the Rio Grande Water Conservation District document received from Colorado State Engineer Dick Wolfe May 1, 2017, this data will be broken down to include the following: Subdistrict diversions, depletions, replacement sources and river calls on a monthly basis.

Synopsis of October 2017 Replacement Water Operations:

Under the direction of the Division 3 Division Engineer and the District 20 Water Commissioner, Subdistrict No. 1 continued replacing projected stream reach depletions on the Rio Grande for the month of October on a daily basis pursuant to the amounts presented in the approved, revised July 6, 2017 Response Functions for the Subdistrict's 2017 ARP. October's replacement water plan continued with a release to the river from the approved Colorado Parks and Wildlife Tabor Ditch #2 trans-mountain water account held in Rio Grande Reservoir on September 30th in the amount including transit loss of 4.10 ac-ft. /day for projected depletion obligations beginning October 1st in Stream Reach 1 and 2 on the Rio Grande. In an effort to utilize the approved, vintage trans-mountain water accounts held in Rio Grande Reservoir, the Subdistrict requested that the Water Commissioner utilize the Rominger Williams Creek Squaw Pass and San Luis Valley Irrigation District Tabor Ditch #2 trans-mountain water accounts as well during the month. The 4.10 ac-ft. /day release rate continued from the trans-mountain water pool held at Rio Grande Reservoir through the end of the month fulfilling the daily projected obligations in Stream Reach 1 and 2. There were no projected depletion obligations in Stream Reach 3 on the Rio Grande for the month of October identified in the revised July 6 Response Functions. Balance of CBP 2017 ARP allocation as of November 1st: 990.0 acre feet.

The following Tables 1 and 2 illustrate the Subdistrict's replacement water plan operations on a daily basis during October, 2017. Detailed accounting for daily administration can also be found on the Rio Grande Water Conservation District's website (<http://rgwcd.org>) under Subdistrict No. 1 Annual Replacement Plan.

Table 1: Subdistrict No. 1 projected depletions for the month of October 2017 as per Table 2.6, Subdistrict No. 1 Monthly Net Stream Depletions for the Plan Year, located in the July 6, 2017 revision, and daily replacement source to meet that depletion: October projected depletion total: 112.0 ac-ft. October replacement operation total: 112.0 ac-ft. (All units' are in acre feet)
